

B Size VMS

The Hi-Lux Variable Message series of signs are designed from the ground up to be reliable and easily maintained reducing or even eliminate the need for costly maintenance and repair. The B Sized VMS sign is Hi-Lux's second largest sign featuring optional redundant power supplies and redundant controllers.

Our VMS sign is designed to minimise down time, costly service calls and public disruptions by relying on redundant components load sharing and alerting of any noncritical failures via the communications protocol, allowing for repair on subsequently scheduled service runs.

Features

- Hi-Lux Constant Current Driver Technology
- Variable message displays in either single or 4-colours
- LED Fault Detection
- Multi-Stage Dimming
- Standard 24 Month Warranty
- Battery Backed (optional)
